sures to have the captain's body decently interred. A meeting of the officers of the several regiments of the first and third brigades, will be beid joinghip at General Hubbell's head quarters to make the necessary arrangements. The meeting was called lastnight.

There was an active business in stocks today, and some of them fell off towards the close in spite of efforts to maintain their prices. The following quotations will give a better idea of the feverish state of the market, than any remarks that can be made:

Naval.—The Secretary of the Navy and Commodores Warrington and Shubrick, set out for Norsolk on Saturday night via Richmond, on a visit of inspection to our squadron which now lies at Norfolk, and to the navy yard. It has been seldom that a more gallant American squadron has been lying in that harbor, than at the present time—some of our vessels just coming in, and others just going out. He will see the trim in which they respectively appear. The squadron consists of Commodore Bolton's fing ship the Pennsylvania; the Congress, Capt Stockton, just bound to the Pacific, the Marion, Commander Simonds, for the coast of Africa; the Brandywine, Commodore Parker's fing ship; the St. Louis, Capt McKeever, the Perry, Commander Paine, (the three last just returned from the East Indies) the Flirt, Lieut Watson commanding; and the Columbia, Capt, Rousseau, just preparing for sea.

The Secretary and the two commodores expect to return to Washington on Wednesday evening or Thursday morning

HEALTH OF NEW ORLEANS—The Tropic of the 15th inst., states that the Board of Health had an extra session on the Friday evening previous. In reporting "two more cases of yellow fever of mild character," they "deem it proper to state that the disease cannot at present be considered malignant or epidemic." The citr continues remarkably healthy. It is still the opinion of many of our best physicians, that there is little or no prospect of an epidemic. The Charity Hospital is an index to the health of the city, and no case has appeared there. Under these circumstances we see no reason why unacclimated persons should be at all alarmed. A healt ier city than New Orleans at the present time exists not in the Union.

A: Cassius M. Clay has published a letter in the "Ercles vein." in which he threatens to republish his abolition paper—we presume at Cincinnati. All the abolitionists are, of course, cheering him on. The great body of the citizens of the North do not sympathize with him in the feelings he expresses.—Union. A Duel.—On Saturday evening, a duel was fought on the Gentilly Road, between two gentlemen of this city—weapons, small swords. One of the party received a wound in the right breast, which it is said will prove mortal.—N. O. Republican, Sept. 15.

ANOTHER RUMOR. - The Mobile Herald of the

16th says:—We hear a rumor on good authority from Texas, that eight thousand Mexicans were marching on the Rio Grande. The rumor is from so high a source that it can hardly be doubted.

THE COTTON PERSSES.—We see that many of our cotton presses have already commenced operations, and others are making extensive preparations for the coming sesson. The new crop is rapidly arriving in the market.—N. O. Republican, Sept. 15.

The Crops.

The last Glasgow (Mo) Pilot says:—"The tohacco crop, which has been very promising in this neighborhood, is very much injured recently by the tobacco worm, which is more destructive than has ever been known here. We have rode by several fields of tobacco, the leaves of which are tattered by them, as if cut up by a severe hail storm. The old ground seems to suffer most."

the leaves of water. The old ground seems to a severe hall storm. The old ground seems to most."

The Expositor, published at Independence, says:—"The crops of corn with us this year are abundant. The wheat crops also were very good. The hemp crops are partial, and in some places total failures. In the main it is below an average crop."

Foreign Markets.

Barnadors, Sept. 4.—Flour had again declined, selling at \$6.80, having during the previous week realised \$6.75. Cornmeal had improved 25 cts. per bbl. On Wednesday, the morning of the 3d of Sept., a heavy rain had set in thereby encouraging the hopes of the planter who has suffered under the previous intensely hot sums and dry weather.
